ParoCHU Education program
2020-2021

To make perio even better!

*Continuing Education
in Periodontology*

Department of Periodontology,
Implant Surgery and Oral Surgery

SERIES MASTERCLASS TRAINEESHIP

Do you want to improve your practice in Periodontology and Implantology?

The ParoCHU team invites you to its new education program specially designed for all practitioners interested in periodontology and implantology!

ParoCHU **Series**

The Parochu Series are a series of lectures where international guest speakers are invited to present their latest development in periodontology and implantology.

Masterclass in mucogingival surgery or in bone augmentation procedures

These 3-day courses aim to combine theory and practice with practical workshops for up to 20 people. Modern teaching methods using the newest technologies are on the agenda.

Clinical **Traineeship**

2-day observation clinical course around real-life surgical procedures.

4 dates
4 conferences
4 international speakers!

ParoCHU **SERIES**

Tuesday

22.09.20

16:00 - 20:00

ParoCHU SERIES

Regenerative treatment for periodontal infrabony lesions

Prof. Anton **Sculean**

Anton Sculean is professor and chairman of the Department of Periodontology and currently the Executive Director of the School of Dental Medicine, University of Berne, Switzerland. He qualified in 1990 at the Semmelweis University in Budapest, Hungary and has received his postgraduate training at the Universities Münster, Germany and Royal Dental College Aarhus, Denmark. He received his Habilitation (Ph.D.) at the University of

Saarland, Homburg, Germany. He is the editor of the book Periodontal Regenerative Therapy published by Quintessence and guest editor of the Periodontology 2000 Issue published in 2015 entitled "Wound Healing in Periodontology and Implantology".

Professor Sculean served from 2018-2019 as president of the European Federation of Periodontology (EFP). Very recently he was elected as board member of the Osteology Foundation and member of the Workshop Committee of the EFP.

His research interests focus on periodontal wound healing, regenerative and plastic-aesthetic periodontal therapy, use of antibiotics, antiseptics and novel approaches such as lasers and photodynamic therapy in the treatment of periodontal and peri-implant infections.

 Conference in English

Ms. Romane **Lilet**

Ms. Marianzela **Alexopoulou**

SCHEDULE

15:30 Welcoming
 16:00 to 17:30 **Regenerative treatment for periodontal infrabony lesions.**
 18:00 to 19:00 **Postgraduate program in Periodontology - EFP thesis defense:**
Research project presentation of 3rd year students.
 EFP : examiner : Prof. Anton Sculean.

Ms. **Romane Lilet:**

Immediate tooth replacement in the posterior region combining a custom - made healing abutment and socket management hard and soft tissue outcomes after 1 year.

Ms. **Marianzela Alexopoulou:**

Immediate implant in the posterior region combined with alveolar ridge preservation and Sealing Socket Abutment:
 A retrospective 3D radiographic Analysis.

20:00 Proclamation and cocktail.

ParoCHU SERIES

Augmentation of localized of defects in the alveolar ridge

Prof. Stogard **Jensen**

Augmentation of localized of defects in the alveolar ridge. Localized bone defects in the alveolar ridge include extraction sockets, periimplant defects, the atrophic posterior maxilla, and horizontal and vertical defects requiring staged augmentation procedures to allow dental implant placement in the correct 3D position for the later prosthetic rehabilitation.

There is not one single grafting material that is ideal to cover all these indications. During the seminar, the characteristics of the different available bone grafting materials will be presented and how these characteristics influence the material properties. The biologic potential and limitations of bone substitute materials will be compared to autografts.

Based on this information, it will be discussed how the different classes of bone grafting materials may assist the clinician in achieving favorable and predictable long-term results augmenting localized bone defects in the alveolar ridge.

 Conference in English

Partnership with

**International Team
for Implantology**

Prof. Stogard Jensen

DDS from the School of Dentistry, University of Copenhagen 1996, certified specialist in Oral and Maxillofacial Surgery 2004. From 2001 until 2014 part-time research fellow at the Dept. of Oral Surgery and Stomatology, School of Dental Medicine, University of Bern, Switzerland.

Since 2005 consultant oral and maxillofacial surgeon at the Dept. of Oral & Maxillofacial Surgery, Copenhagen University Hospital, where he is Head of the division treating patients with congenital missing teeth and early trauma related tooth loss. From 2019 professor at the Dept. of Oral Surgery, School of Dental Medicine, University of Copenhagen.

Former vice president of the Danish Association for Oral and Maxillofacial Surgery. Education delegate of the Danish ITI Section from 2005 to 2015 and Section Chairman from 2015-2018. Member of the Education Committee of the ITI 2010-2017.

Main research and focus areas are: Implant dentistry, experimental evaluation and clinical performance of bone grafting materials, bone augmentation procedures, bone growth factors and surgical endodontics.

Le défi du secteur esthétique en implantologie

Prof. Hadi **Antoun**

La perte osseuse suite à une extraction dentaire est un processus physiologique inéluctable. La sévérité de cette résorption dépend de plusieurs facteurs et l'effondrement de la muqueuse suit généralement le niveau osseux. Les techniques d'augmentation osseuse et muqueuse sont nombreuses et plus ou moins complexes. La taille et la forme du défaut, les contraintes esthétiques du secteur antérieur seront déterminantes dans le choix de la ou les techniques les plus appropriées.

La préservation alvéolaire ainsi que l'approche immédiate en particulier dans le secteur antérieur ont pris un essor particulier ces dernières années. Une maîtrise appropriée des indications et des choix chirurgicaux ainsi que prothétiques seront les seuls garants d'une optimisation des résultats esthétiques. Enfin, l'apport du digital devient incontournable aussi dans la gestion de ces cas particulièrement sensibles.

Nous développerons lors de cette présentation ces différents aspects permettant d'améliorer l'environnement ostéo-muqueux d'une façon prédictible en particulier au niveau du secteur antérieur où les résultats esthétiques et fonctionnels vont de pair.

 Conférence en Français

Partenariat avec

 **Nobel
Biocare[™]**

Prof. Hadi Antoun

Le Dr Hadi Antoun obtient son diplôme de Chirurgie Dentaire de Lyon, un CES d'histologie embryologie puis de parodontologie (Paris VII) ensuite un DU d'Implantologie Chirurgicale et Prothétique (Paris VII).

Il a été attaché dans l'Unité d'Implantologie de Paris VII, est Professeur invité à l'Université Saint Joseph à Beyrouth et exerce à titre exclusif l'implantologie et la parodontologie.

Le Dr Antoun est auteur de plusieurs publications et d'un livre sur les greffes de sinus. Il a fondé et dirige l'institut de formation en chirurgie implantaire avancée (IFCIA).

Vertical ridge augmentation; the challenge to success

Prof. Isabella **Rocchietta** DDS, MSc, Specialist in Periodontics

Dental implants have been successfully implemented as a routine therapeutic approach in partially and fully edentulous patients. Alveolar defects compromise the “prosthetically-driven” dental implant positioning, unless a detailed planning is performed prior to the surgical phase. Many techniques have been described to augment alveolar bone, including autogenous block grafts, titanium mesh, distraction osteogenesis, guided bone regeneration, just to name a few.

The use of Guided Bone Regeneration associated to non-autogenous scaffolds constitutes the standard of care of bone augmentation in all alveolar defects with or without implants, including the most severe vertical deficiencies. Choosing the correct therapeutic approach with the appropriate biomaterials is a fundamental player to achieve success in advanced GBR procedures.

Learning objectives:

1. To understand the biological principle of GBR in its clinical applicability
2. Learn tips and tricks on how to perform Vertical GBR in severe defects
3. Learn how to avoid and manage complications in GBR

 Conference in English

Prof. Isabella **Rocchietta**

Honorary Senior Research Associate to the department of Periodontology of the UCL Eastman Dental Institute, London. Lecturer for the Diploma in Implant Dentistry at The Eastman Dental Institute, UCL, London and affiliated with the Department of Biomaterials, Institute for Clinical Sciences, The Sahlgrenska Academy at the University of Gothenburg, Sweden, where she conducts clinical research in the field of implantology and bone regeneration. Currently elected Board Member of the EAO (European Academy for Osseointegration). Chairman of the EAO Junior Committee from 2007 to 2011 and member of the Experts Council of the Osteology Foundation. Author of several international peer reviewed publications and book chapters and International speaker on bone regeneration, bone grafting with growth factors, tissue engineering, soft and hard tissue neo-formation with autogenous living cells, osseointegration and implant protocols. Dr. Isabella Rocchietta currently performs clinical work limited to periodontics and implant dentistry in London, U.K.

ParoCHU **MASTERCLASS**

Mucogingival surgery or bone augmentation
procedures : from theory to practice

Wednesday, Thursday, Friday

28-29-30.10.20

ParoCHU MASTERCLASS

Mucogingival surgery

This Master Class aims to educate the participants on basics and more advanced mucogingival techniques allowing the optimisation of the soft tissues around teeth and implants. The benefits and the limits of these procedures will be considered step by step and illustrated with a number of clinical cases and 3D videos. Finally, the participants will be trained to the practical aspects of these surgeries with a half day hands-on session on porc jaw.

The overall objective is to make the participants familiar with microsurgical concepts and allow them to understand the indications, the key principles and the technical aspects of these type of interventions.

The maximum number of participants for this Master Class is 20 to allow a personalized training and better interactions with the instructors, in a warm and friendly atmosphere.

Masterclass in English

Dr. Geoffrey **Lecloux**

Prof. Eric **Rompen**

Prof. France **Lambert**

Dr. Bruno **De Carvalho**

Specific topics :

- Microsurgery: incisions, flaps release and advanced techniques of sutures
- Preprosthetic and esthetic crown lengthening
- Socket management
- Free gingival graft
- Connective tissue graft (socket, tunnel)
- Periimplant soft tissue management

Innovative teaching methods :

- A half-day hands-on session on pork jaws
- Numerous 3D videos during the sessions
- One-to-one interactions with the instructors
- E-Learning training before and after the Master Class

WEDNESDAY 28.10.20

- 13:30 to 14:00 Welcoming
14:00 to 15:30 **Introduction & general**
15:30 to 16:00 Break
16:00 to 17:30 **Subtractive procedures**

THURSDAY 29.10.20

- 08:30 to 09:00 Welcoming
09:00 to 10:30 **Extraction socket management**
10:30 to 11:00 Break
09:00 to 12:30 **Biomaterials - harvesting**
12:30 to 14:00 Lunch
14:00 to 17:30 **Practical approaches**

FRIDAY 30.10.20

- 08:30 to 09:00 Welcoming
09:00 to 10:30 **Grafting procedures on natural teeth**
10:30 to 11:00 Break
09:00 to 12:30 **Peri implant mucogingival surgeries**
12:30 to 14:00 Lunch
14:00 to 17:30 **Practical approaches**

ACCREDITATION Accreditation requested: 80 points, domain 6

Wednesday, Thursday, Friday

20-21-22.01.21

ParoCHU MASTERCLASS

Bone augmentation procedures

This Master Class aims to update the dental professionals with the bone regeneration basic principles and with modern bone augmentation procedures.

Different surgical techniques such as horizontal and vertical bone augmentation as well as sinus lift will be described step by step through 3D movies. The advantages and limitations of these several procedures will be discussed in details.

Moreover, in order to help the practitioners in the biomaterial's selection, an overview of the optimal characteristics for the current and future biomaterials will be given.

The overall goal is to train the participant to analyze the clinical situation, select the most appropriate technique according to the type of defect and integrate the key principles in these types of interventions.

This Master Class aims to update the dental professional with the bone regeneration basic principles and with modern bone augmentation procedures.

 Masterclass en Français

Dr. Geoffrey **Lecloux**

Prof. Eric **Rompen**

Prof. France **Lambert**

Dr. Bruno **De Carvalho**

Specific topics :

- Bone healing – Guided bone regeneration principles
- Microsurgery: incisions, flaps release and advanced techniques of sutures
- Extraction socket management
- Horizontal and vertical bone augmentation
- Sinus lift
- Biomaterials selection
- Future perspectives in bone regeneration

Innovative teaching methods :

- 2 half-day hands-on sessions on pork jaws and models
- Numerous 3D videos during the sessions
- One-to-one interactions with the instructors
- E-Learning training

WEDNESDAY 20.01.21

- 13:30 to 14:00 Welcoming
14:00 to 15:30 **General concepts**
15:30 to 16:00 Break
16:00 to 17:30 **Socket management**

THURSDAY 21.01.21

- 08:30 to 09:00 Welcoming
09:00 to 10:30 **Horizontal and Vertical bone augmentations**
10:30 to 11:00 Break
11:00 to 12:30 **Clinical cases and videos**
12:30 to 14:00 Lunch
14:00 to 17:00 **Hands-on**
17:00 to 17:30 **Question & Answers**

FRIDAY 22.01.21

- 08:30 to 09:00 Welcoming
09:00 to 10:30 **Sinus lifts**
10:30 to 11:00 Break
11:00 to 12:00 **Futures directions and perspectives**
12:00 to 13:30 Lunch
13:30 to 17:30 **Hands-on**

Testimonial

La dentisterie évolue tellement que je voulais me remettre à jour, il y a quelques années, j'ai fait mon CUC en implantologie ici à l'Université de Liège et la disponibilité des professeurs étant excellente, je n'ai pas hésité à m'inscrire à ce master class qui m'a permis de découvrir les nouvelles techniques de gestion d'alvéoles, de sutures et de greffes que je ne pratiquais pas avant.

Olivier C.

Dentiste généraliste implantologue

C'est plutôt positif, que l'on soit expérimenté ou pas, il y a un intérêt pour tous d'apprendre. Ceux qui ont plus d'expérience peuvent découvrir les petites astuces pendant l'oral et pratiquement sur les mâchoires de porcs. Ceux qui ont moins d'expérience peuvent aussi découvrir et apprendre. Donc je pense qu'il y a vraiment un élément positif pour ceux qui ont peu ou beaucoup d'expérience.

Au niveau du privé, je pose pas mal d'implants. Je suis plus dans l'implantologie que dans la paro.

J'avais quelques lacunes en paro, je pense qu'avec une formation comme telle, ça va compléter mes connaissances point de vue implantologie. (Je ramène le domaine de la paro au terme de mes interventions et je pense que ce qui est greffe de conjonctifs au niveau des implants et des dents naturels, il y a un gros positif).

Ihab.K

Dentiste généraliste implantologue

Cette formation m’a permis d’approfondir mes connaissances au point de vue parodontologie et implantologie. Le système e-learning mis en place est très intéressant pour se préparer aux sessions théoriques et pratiques. Les professeurs sont très disponibles durant les travaux pratiques et répondent aux questions durant les sessions théoriques.

Létithia. D.

Dentiste généraliste implantologue

J’ai une pratique en dentisterie générale et je voulais évoluer en dentisterie plus esthétique et plus pointue. Participer à cette formation alliant théorie et pratique, encadrée d’une équipe connue de l’université de Liège va m’apporter au quotidien plus d’assurance dans mes actes techniques.

Julien D.

Dentiste généraliste implantologue

La formation est assez complète. Ce côté théorique assez rigoureux, très strict est important, même s’il y a des choses évidentes. C’est toujours bon de remettre les pendules à l’heure et de remettre les choses en place. Dans la pratique, c’est bien d’être guidé même si ce sont des actes que l’on fait, c’est toujours intéressant de voir les petits trucs que l’on peut nous apporter. C’est une formation assez complète, rigoureuse, intéressante. Ça ne met pas en place de nouvelles choses. Je ne travaille pas avec des loupes mais j’y pensais depuis un certain temps, grâce à ça je pense que je vais passer de l’autre côté. C’est plus prendre des trucs çà et là pour améliorer le quotidien, peut-être pas de changement radical mais juste des petites touches qui vont venir s’ajouter à la pratique au quotidien.

Marie B.

Parodontologue

Je suis Parodontologue et je voulais assister à cette formation pour accompagner mon collaborateur et associé, afin de le stimuler et aborder les aspects chirurgicaux, techniques et théoriques dans un domaine qui est très particulier la parodontologie et l’implantologie.

Cette formation est bien véhiculée est bien diversifiée.

En général ceux qui abordent un cursus, c’est plutôt une démarche passive, mais ici il y a beaucoup plus d’interactivité.

Il y a un background à domicile devant le pc, il y a les quiz, un forum de discussions, les travaux pratiques, des cours théoriques, des films 3D, donc c’est très diversifié, très vivant, très didactique et très ludique.

Michel L.

Parodontologue

The participants who wish to assist in clinical practice will be given the opportunity to undertake a 2-day clinical traineeship.

ParoCHU TRAINEESHIP

Next dates:

21 & 22.10.20
09 & 10.12.20
17 & 18.02.21
20 & 21.04.21

PRICES

PAROCHU SERIES 175,-€ per conference
+ 25,-€ for late registration (15 days prior the conference)

MASTERCLASS 2650,-€ (2,5 days)

CLINICAL TRAINEESHIP 1000,-€ (2 days)

PACKAGE PAROCHU SERIES 4 ParoCHU series: 600,-€

Theoretical courses will be organized in the beautiful setting of the Château de Colonster (Sart-Tilman) and the catering will be provided by the Brasserie «Heliport», Michelin star brasserie.
